

eNote Board

Electronic Flip Chart Whiteboard

Real-time synchronization via multi devices causes communication process more effectively and facilitates the meeting progress more smoothly for corporate or schools. eNote Board is a digital flipchart to be used for transmitting the written content after scanning the provided QR code. The content is written by normal whiteboard marker, then the board will be synchronized with the users' tablets or mobile devices (support Windows, IOS & Android). The users can use their own tablets or mobile devices to share to others and to make notes on the transmitted content instantly and directly.
